SUMMARY

Final-year Cyber Security Student and aspiring Penetration Tester with hands-on experience in vulnerability assessment, exploit testing, and cloud security. Skilled in discovering and mitigating system vulnerabilities using Nmap, Wireshark, Python, and AWS Security tools. Strong foundation in ethical hacking, cryptography, and secure software engineering. Passionate about protecting digital assets through secure architecture design, security automation, and continuous testing.

EDUCATION

Arunai Engineering College, Tihruvannamalai, Tamil Nadu
Bachelor of Engineering, Computer Science & Engineering (Cyber Security)
(GPA: 8.0 / 10 (Till 6th Semester))

TECHNICAL SKILLS

- Security & Pen Testing Tools: Nmap, Wireshark, Burp Suite (basic), OWASP ZAP (basic), Metasploit (basic), Kali Linux
 - Programming Languages: Python, C++, java
 - Databases: MongoDB, MySQL, Firestore
 - Methodologies: OWASP Top 10, SDLC, REST API Security, CI/CD, System Design
-

PROJECTS

- 1). Smart Traffic Management system
 - 2). FaceGuard – AI tool to detect and remove misused photos from Any websites".
 - 3). Deepfake Audio and Video Detector
 - 4). HemoVision AI
-

CERTIFIED COURSE

Network Security -(Cisco)
Ethical Hacking -(Cappriciosec University)
Cyber Security and Ethical Hacking basic level -(Cappriciosec University)
Embedded System Design using C Programming -(Maven Silicon)

Archivment : 2nd Price in Design warrior (University of Engineering College Tindivanam)
